PROFESSIONAL SUMMARY

Frontend Developer focused on building clean, responsive, and user-friendly web interfaces. Experienced in translating UI designs into functional websites using modern web technologies. Strong attention to layout, responsiveness, and performance.

WORK EXPERIENCE

Front-end Developer (Project-Based / Self-Directed)

- Built responsive and scalable web applications using React, Next.js, and modern CSS frameworks
- Converted UI designs into functional, mobile-responsive interfaces
- Integrated APIs to fetch and display dynamic content
- Managed codebases using Git and GitHub
- Deployed projects and ensured cross-browser compatibility

PROJECTS

Restaurant Website
- Designed and developed a responsive restaurant website
- Implemented modern UI components using React and Tailwind CSS
- Ensured mobile responsiveness and smooth navigation
- Deployed live for public access

TechNews Project
- Built a tech news platform consuming external APIs
- Displayed real-time tech news articles dynamically
- Used modern JavaScript frameworks for performance and scalability
- Focused on clean layout, readability, and responsiveness
